8. Final Note: Why Early Partnership Matters

We believe in rewarding those who build with us, not just for us.

By negotiating an early partnership for NocturneSwap's development, you become part of our cult's origin before the token trends, before the headlines.

This collaboration helps us unlock our final fundraising phase, prove progress to our donors, and strengthen trust with our community.

You won't just be a dev team. You'll be immortalized as a founding architect of the cult economy.
